- Small Caps have relatively better diversification across sectors
- Most of the Industry Market Majors are present in Small Caps-
 - Capital Goods
 - HealthCare
 - Chemicals
 - Services

Small Caps have Wider Sector Representation

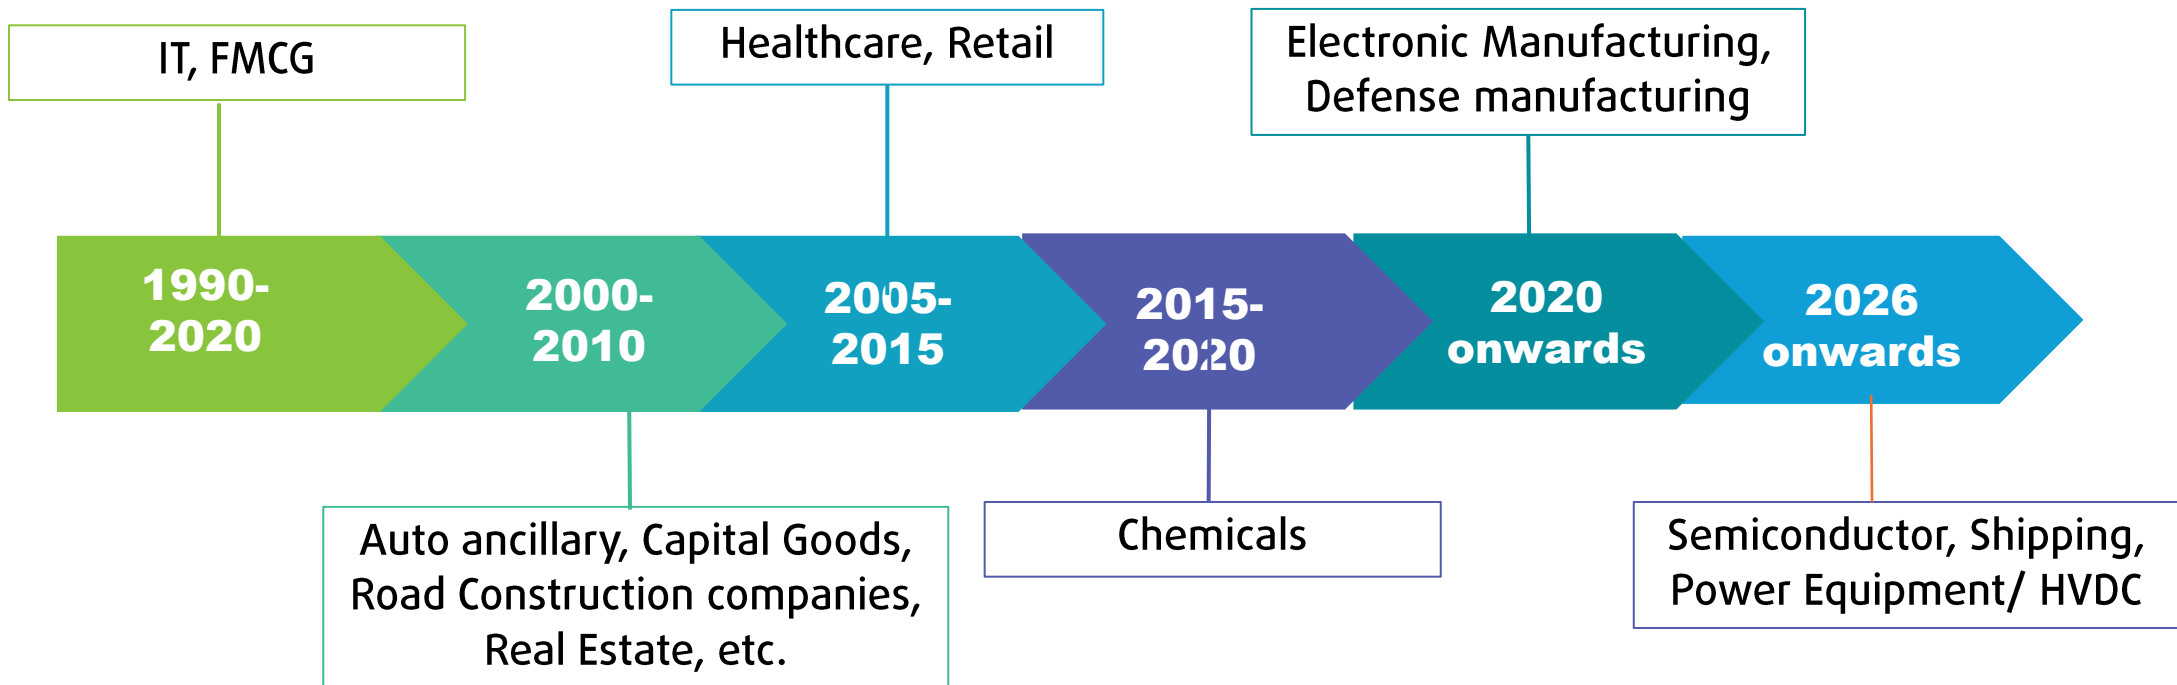

No. of Analysts
(Brokerage House Coverage)

- **Small Caps have limited analyst coverage** which results in pricing inefficiencies and hidden opportunities
- **Small Caps have Information Asymmetry = Opportunity**, and an in-depth research can lead to early-stage discovery
- **Small Caps have higher potential for alpha generation**; more room for fundamental research to add value

Every 5-year new sector/theme emerges which contributes to GDP for medium to long term & when they started, they started as small cap companies

High Growth Potential

- Small cap companies expand faster than established companies, offering investors the opportunity to benefit from early - stage growth over long investment horizons.

Better Long-Term Wealth Creation

- Better long-term wealth creation is achieved through disciplined investment in small-cap funds, where sustained business growth, combined with the power of compounding, can significantly increase overall portfolio value over longer time horizons.

Opportunity to Discover Future Leaders

- Opportunities to discover future leaders allows investors to gain early exposure to innovative and high-potential businesses, which can evolve into industry leaders, offering substantial capital appreciation as they scale and strengthen their market presence.

Diversification Advantage

- Diversification advantage enhances portfolio stability by incorporating small-cap investments that typically respond differently to market movements, helping reduce concentration risk while improving the potential for balanced and optimized long-term returns.

Small Cap Funds can generate relatively higher returns over the long term, though with higher volatility and risk

Least Volatility
